

Our planes will become a flying phone booth. It is difficult enough to get passengers to turn off their phones when providing safety information. My fear is that you will have 100 + passengers all talking at the same time. We need passengers to be aware of their surroundings now more than ever. By allowing passengers to talk on their cell phone will be the biggest distraction of all. Also, by allowing cell phone usage during flight could turn into major security issue. Please do not allow cell phone usage on our planes while in the air.
